DNA and Destiny: 2-in-1

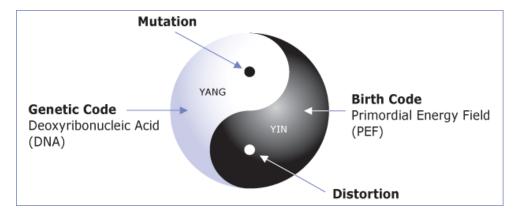

Hew, Yon Long

Nobel Laureate James Watson, the co-discoverer of the DNA double helix, told *Time Magazine* in 1989, "We used to think our destiny was in the stars. Now we know it's in our genes¹." The author believes that his quotation was wrong, it's the star constellations' primordial energy field decides our destiny. Human are made of stardust, major elements found in the human body called the building blocks of life deriving from stars in our milky way. Due to the earth's rotation, stars appear to move, constellations changing positions. Therefore, the destiny-path of all life on Earth changes accordingly.

What is DNA?

DNA, or deoxyribonucleic acid, is the hereditary material in humans and almost all other organisms. Nearly every cell in a person's body has the same DNA. Most DNA is located in the cell nucleus. A gene is the basic physical and functional unit of heredity. Genes, in which are made up of DNA, act as instructions to make molecules called proteins. Each chromosome contains many genes. In humans, genes vary in size from a few hundred DNA bases to more than 2 million bases. The Human Genome Project has estimated that humans have 30,000 genes. It is surprising to find such a small number of genes, and some question it as to account for all information specifying a human being. The genetic factor is responsible for our physical appearance, such as eye color, face shape, height, skin color, genetic disease, etc. Scientists are now inclined to believe that intelligence, personality, cognitive behavior, and daily activities are all genetically influenced, not program, but influenced. That is to say a person's character is influenced by the genetic factor as well as the environmental factor such as family background, growing up environment, education condition, social activities, etc.

Character determines our destiny or destiny determines our character? The author believes that gene sequencing unable to unveil one's destiny, unless with the introduction of vin-yang doctrine into DNA study. According to Yi Jing's yin-yang doctrine, when the sperm (yang) and egg (yin) cells unite at conception, genetic recombination happens during meiosis, body formed, the genetic code; when a person is born, the primordial energy field attaching the body, qi formed, the birth code. The brightness and position of star constellation decide the strength and weakness of the primordial energy field. According to the present understanding, there are four fundamental interactions or forces: strong nuclear force, electromagnetic force, gravitational force, and weak nuclear force. That is to say, with the intervention of the four fundamental forces, chemical changes occur in human genes. It had been observed by scientists that human genes resemble the stars in space. Human genes are not spread evenly in the landscape. Some genes are packed into populous centers much like cities, while others are dispersed across the relative wilderness. Different genetic loci determine the difference of each individual, including weight, character, height, health, etc., that is to say the innate character of the person has formed in the fetus. When a person is born, the primordial energy field attaches the body, subsequently forming the destinypath. There is such a characteristic that there is such a primordial energy field, both are interrelated. Therefore, character determines our destiny. The Earth's motion causes star constellation changes, the genetic loci and primordial energy field changes as well, so is human destiny.

DNA is a long-chain polymer. The information in DNA is stored as a code made up of four chemical bases: adenine (A), guanine (G), cytosine (C), and thymine (T). The gene sequence inscribed in DNA, and thus in RNA, is composed of units called "codons," each coding for a single amino acid (building block of life). Both DNA and RNA are comprised of 4 nucleotide bases. Codons are non-overlapping groups of the three bases (3 out of 4 bases). There are $4^3 = 64$ codons. My question is: Why 64 codons? Why does this process of differentiation stop at 20 amino acids? One possible answer is that the code is an immutable "vital engine of life" since the earliest stage of evolution. Another answer is that the code contains *yin* and *yang* (the doctrine of Yi Jing) and we just haven't introduced it into the 20 amino acids.

The fundamental of Yi Jing is yin (- - or X) and yang (— or Y). According to Yi Jing's Text, yin-yang appeared after the Big Bang, it then generated the four appearances namely Old Yin "X", Old Yang "Y", Young Yin "x", and Young Yang "y". Four appearances then created Eight Natures (Ba Gua). The legendary sage emperor Fu Xi (around 2852 B.C.) observed the natures and created the primary eight trigrams, each trigram contains and uses groups of three letters or three lines (triplet) that make up one trigram. Each trigram symbolizes different natures, called Eight Natures. Ba Gua overlapping becomes 64 Hexagrams. The author postulates that X codes for A, Y codes for C, x codes for G and y codes for T. The reason for this arrangement is because Water (XYX, similar to water molecule H₂O (H-O-H)'s arrangement) and Mountain (YXX) symbolize start and stop respectively according to Yi Jing's Yin-Yang Five Forms (Water, the Liquid Form, Yin Water or Liquid Passive, Yang Water or Liquid Active; Wood, the Fibrous Form, Yin Wood or Fibrous Passive, Yang Wood or Fibrous Active; Metal, the Solid Form, Yin Metal or Solid Passive, Yang Metal or Solid Active; Earth, the Granular Form, Yin Earth or Granular Passive, Yang Earth or Granular Active; Fire, the Gaseous Form, Yin Fire or Gaseous Passive, Yang Fire or Gaseous Active). This is similar to the arrangement of start codon ATG (Xyx), same as X-Y-X arrangement and stop codon TAA (yXX), stop codon TAG (yXX), and stop codon TGA (yxX), same as Y-X-X arrangement. The author based on yin-yang doctrine discovers 32 kinds of amino acid, from 20 standard amino acids extended to 32 yin-yang amino acids, exactly half of the 64 codons. Please refer to the following Table: StandardAmino Acids vs. Eight Natures. Eight Natures are: 1. Qian, the Celestial Bodies YYY (Yang Metal) 2. Dui, the Swamp XYY (Yin Metal) 3. Li, the Fire YXY (Yin Fire & Yang Fire) 4. Zhen, the Quake XXY (Yang Wood) 5. Xun, the Wind YYX (Yin Wood) 6. Kan, the Water XYX (Yin Water & Yang Water) 7. Gen, the Mountain YXX (Yang Earth) 8. **Kun,** the Earth XXX (Yin Earth).

32 Yin-Yang Amino Acids

What is Yin-Yang Amino Acids?

Example 1:Leucine → Celestial Bodies —Wind

Leucine (CTT, CTC) (Yyy, YyY)—(CTA, CTG, TTA, TTG) (YyX, Yyx, yyX, yyx), similar to Leucine (Celestial Bodies YYY) and Leucine (YYX). That is to say Leucine can be divided into Leucine (Yang Metal) and Leucine (Yin Wood).

Example 2:Serine → Celestial Bodies—Wind—Quake

Serine (TCT, TCC) (yYy, yYY)—(TCA, TCG) (yYX, yYx)—(AGT, AGC) (Xxy, XxY), similar to Serine (Celestial Bodies YYY), Serine (Wind YYX), and Serine (Quake XXY). That is to say Serine can be divided into Serine (Yang Metal), Serine (Yin Wood), and Serine (Yang Wood).

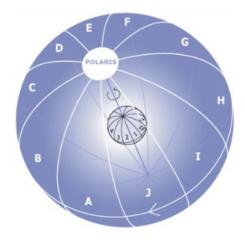

The author believes that split the amino acids into yin-yang group can diagnose the diseases more precisely, particularly mental illness.

What is the Primordial Energy Field?

There are 64 codons in the genetic code, 64 hexagrams recorded in Yi Jing, without exception, there are 64 Primordial Energy Field's XY triplets permeate the entire universe. The primordial energy field is the foundation for the existence of humanity as well as the universe. Primordial energy field is derived from the early explosion of the universe called the Big Bang roughly 5 billion years ago. To link the DNA with the Destiny, Zi Wei Dou Shu is introduced. Zi Wei Dou Shu, the Chinese ancient behavioral science, remains one of the most respected processes to map one's destiny based on his/her birth date and time. There are twelve relation zones with 64 stars in the chart to tell one's destiny-path. The 64 stars used in the Zi Wei Dou Shu system indeed is similar to Yi Jing's 64 hexagrams both reflects the archetypal situations of human life itself. As of today, the author has identified: the dominant YYY, Yyy, YyY, yyy, YYY, YYy, yYY, triplet from the Polaris (North Pole Star) in of the Earth, i.e. from North Pole Star to South Pole Star in the constellation of Sagittarius; the dominant yxy, yxY, Yxy, and YxY triplet from the Sun; the dominant XyX, xyX, xyx, and Xyx triplet from the Moon. The universe is composed of a large number of galaxies, which are formed by various celestial materials under the action of gravitational force and electromagnetic force. The gravitational force rendering celestial materials attracts each other and finally stick together to form a new celestial body. There are all kinds of forces in the universe, which combine the basic particles to form a variety of substances. These forces can be attributed to four basic forces: strong nuclear force, electromagnetic force, gravitational force, and weak nuclear force. These four fundamental forces of great disparity and different nature control the entire universe. The interaction of various celestial bodies in the universe from birth to death, from the bright to the faint is inseparable from the interaction of four forces, so is the primordial energy field's XY triplets. That is to say primordial energy field's XY triplets can be transformed from one form to another with the intervention of four fundamental forces. For example, XXX triplet can be transformed to XXY triplet. Zi Wei Dou Shu's four transformational forces are similar to four fundamental forces: Hua Lu (s, Strong Nuclear Force), Hua Quan (e, Electromagnetic Force), Hua Ke (g, Gravitational Force), and Hua Ji (w. Weak Nuclear Force). Hua literally means transforming, Lu, Ouan, Ke, and Ji literally mean possession, authorization, attraction, and disintegration respectively.

According to contemporary physics the conservation law of parity states that parity is conserved in strong nuclear force, electromagnetic force, and gravitational force. In weak nuclear force, the parity can be violated. From this reference we can see why the universe has more particles than antiparticles, so is in nature we can see more perfect symmetry (the intervention of strong nuclear force, electromagnetic force, and gravitational force, the positive forces) than imperfect symmetry (the intervention of weak nuclear force, the negative force). The main mechanism of driving four transformational forces is based on the Chinese calendar's Ten Celestial Poles. Human character depends on the brain, and emotions are closely related to brain activity. Four transformational forces (Lu, Quan, Ke, and Ji) are the main source to drive human emotions. For example, Lu drives love, Quan drives hegemony, Ke drives display, and Ji drives resentment. The yin and yang five forms are the main tool to decide human emotion. Note: Ancient Chinese used the Ten Celestial Poles (the alphabets) and the Twelve Terrestrial Branches (the numbers) to record year, month, day, and hour.

Amino Acids and Their Functions in the Body

These are the 20 biologically active amino acids in humans. Amino acids can be placed in three categories: Essential, Conditionally essential, and Non-essential. Essential amino acids are those that are "essential" in the diet. In other words, our metabolism cannot create them. Conditionally essential amino acids are usually not required in the diet. However, some individuals do not synthesize some of these amino acids in sufficient amounts and therefore must be included in the diet. Non-essential amino acids are those which can be synthesized from other amino acids in the human body. Conditionally essential and non-essential amino acids are self-synthesized amino acids and therefore subject to body's primordial energy fields' intervention. That is to say, the intervention of four fundamental forces leads to the level of amino acids in the body increased, decreased, or imbalance.

- 1. Isoleucine ATT, ATC; **Isoleucine (Yin Metal)** an essential amino acid, Isoleucine is necessary for hemoglobin formation (an iron-containing conjugated protein respiratory pigment occurring in the red blood cells of vertebrates) and for stabilizing and regulating blood sugar and energy levels. Deficiencies may contribute to muscle twitching and tremors.
- 2. Isoleucine ATA; **Isoleucine** (**Yin Water**) an essential amino acid, Isoleucine is necessary for hemoglobin formation (an iron-containing conjugated protein respiratory pigment occurring in the red blood cells of vertebrates) and for stabilizing and regulating blood sugar and energy. Deficiencies may contribute to muscle twitching and tremors.
- 3. Leucine CTT, CTC; **Leucine** (**Yang Metal**) an essential amino acid, Leucine promotes the healing of bones, skin, and muscle tissue. Because Leucine cannot be made by the body. It is very important to maintain adequate amounts in your diet or by additional supplementation.
- 4. Leucine CTA, CTG, TTA, TTG; **Leucine** (**Yin Wood**) an essential amino acid, Leucine promotes the healing of bones, skin, and muscle tissue. Because Leucine cannot be made by the body. It is very important to maintain adequate amounts in your diet or by additional supplementation.
- 5. Valine GTT, GTC; Valine (Yin Metal) an essential amino acid that is helpful in muscle building (along with isoleucine and leucine) and in liver and gallbladder regeneration. Valine has a stimulant effect. Healthy growth depends on it. A deficiency results in a negative hydrogen balance in the body.
- 6. Valine GTA, GTG; **Valine** (**Yin Water**) an essential amino acid that is helpful in muscle building (along with isoleucine and leucine) and in liver and gallbladder regeneration. Valine has a stimulant effect. Healthy growth depends on it. A deficiency results in a negative hydrogen balance in the body.
- 7. Phenylalanine TTT, TTC; **Phenylalanine (Yang Metal)** an essential amino acid. Phenylalanine comes in two forms which mirror images each other: L-phenylalanine has nutritional value, and D-phenylalanine has painkilling and depression alleviating properties. DL- phenylalanine, is a 50/50 mixture of these two forms. Phenylalanine activity is enhanced by additional Vitamin B6, which has been shown by studies on depression.
- 8. Methionine ATG; **Methionine** (**Yin Water**) an essential amino acid that is not manufactured by your body. It is a principal supplier of sulfur, which improves the tone of your skin. It promotes growth and conditions your hair as well as strengthens your nails. The sulfur also protects the cells from airborne pollutants, such as smog; it slow down the aging process in the cells, and is involved with the production of protein. Methionine is an excellent chelator of heavy metals, such as lead, cadmium, and mercury, binding them and aiding in their excretion from body. It can help in some cases of allergy because it reduces histamine release. **Start Codon ATG (Yin Water):** The intervention of Four Fundamental Forces leads to DNA mutation creating a start codon causes body to produce a bunch of a random protein. Affected Organs: Phantasos (Tan Lang) ↔ Brain Fluid + Kidneys; Odysseus (Ju Men) ↔ Salivary Glands + Stomach Acid; Horme (Po Jun) ↔Excretory Organs (related to body wastes especially urine, sweat, or feces); Selene (Tai Yin) ↔Blood + Womb + Female Sex Hormones; Apollo (Wen Qu) ↔Right Brain + Bile Acid; Lampsace (You Bi) ↔Vein (Circulation).

- 9. Cysteine TGT, TGC; Cysteine (Yang Fire) a non-essential amino acid, which functions as a powerful antioxidant and an immune support substance, neutralizing free radicals. It can help slow down the aging process. It is necessary for the formation of the skin, and aids in the recovery from burns and surgical operations. Affected Organs: Helios (Tai Yang) ↔ Head + Heart + Eyes + Small Intestine + Male Sex Hormones. Agent: Angelia (Tian Kui) ↔ Pheromones.Consequences: Perseus (Qing Yang) ↔ Combustion; Hephaestus (Huo Xing) ↔ Inflammatory. Process of Nature: Fire constitutes Earth. Affected Organs: Clio (Tian Liang) ↔ Telemores (a compound structure at the end of a chromosome which protects our genetic data and also the key to aging and cancer).
- 10. Alanine GCT, GCC; **Alanine** (**Yin Metal**) a non-essential amino acid, which may be considered essential under some circumstances, is an important source of energy for muscle tissue, brain, and central nervous system. It helps in the metabolism of sugars and organic acids, and may also help stabilize the blood glucose levels in people with hypoglycemia. Affected Organs: Kratos (Wu Qu) ↔ Muscles + Bones. Consequences: Horme (Po Jun) ↔ Stamina; Ares (Qi Sha) ↔ Radical; Hunchback (Tuo Luo) ↔ Hump + Lump.
- 11. Alanine GCA, GCG; **Alanine** (**Yang Water**) a non-essential amino acid, which may be considered essential under some circumstances, is an important source of energy for muscle tissue, brain, and central nervous system. It helps in the metabolism of sugars and organic acids, and may also help stabilize the blood glucose levels in people with hypoglycemia. Affected Organs: Hermes (Tian Xiang) ↔Pancreas. **Alanine** (**Yin Metal**) +**Alanine** (**Yang Water**) symbolizes Process ofLife, i.e. Metal constitutes Water. Affected Organs: Eirene (Tian Tong) Yang Water ↔ Ears + Bladder.
- 12. Glycine GGT, GGC; Glycine (Yang Wood) a conditional amino acid, is required by the body for the maintenance of the central nervous system, and in men, Glycine plays an essential role in maintaining healthy prostate functions. It helps trigger the release of oxygen (then form energy) that is required in cell-making process as well as providing nutrients to support a strong immune system and is also a free radical fighter. Affected Organs: Phantasos (Tan Lang) ↔ Male Reproductive Organ + Gallbladder.
- 13. Glycine GGA, GGG; Glycine (Yin Earth) a conditional amino acid, is required by the body for the maintenance of the central nervous system, and in men, Glycine plays an essential role in maintaining healthy prostate functions. It helps trigger the release of oxygen (then form energy) that is required in cell-making process as well as providing nutrients to support a strong immune system and is also a free radical fighter. Affected Organs: Zeus (Zi Wei) ↔ Body Cell. Glycine (Yang Wood) + Glycine (Yin Earth) symbolizes Process of Life, i.e. Trees rely on earth to grow.
- 14. Proline CCT, CCC; **Proline** (Yang Metal) a conditional amino acid, which improves skin texture, proper functioning of joints and tendons. It also helps maintain and strengthen heart muscles. Proline is most effective when adequate Vitamin C is supplied at the same time. Consequences: Perseus (Qing Yang) ↔ Breaking down proteins for use in healthy cells (imply surgical operations).
- 15. Proline CCA, CCG; **Proline** (**Yin Wood**) a conditional amino acid, which improves skin texture, proper functioning of joints and tendons. It also helps maintain and strengthen heart muscles. Proline is most effective when adequate Vitamin C is supplied at the same time. Affected Organs: Dionysus (Lian Zhen) ↔ Skin Texture+ Heart Muscles; Athena (Tian Ji) ↔ Joints + Tendons. **Proline** (**Yang Metal**) + **Proline** (**Yin Wood**) symbolizes Process of Life, i.e. Metal cuts Wood for furniture.
- 16. Threonine ACT, ACC; **Threonine (Yin Metal)** an essential amino acid, is an important constituent in many body proteins and is necessary for the formation of tooth enamel protein, elastin, and collagen (constituent of elastic fibers). It also has a minor role in controlling fat buildup in the liver, helps the digestive and intestinal tracts function more smoothly and can be helpful in some cases of depression.

- 17. Threonine ACA, ACG; **Threonine (Yang Water)** an essential amino acid, is an important constituent in many body proteins and is necessary for the formation of tooth enamel protein, elastin, and collagen (constituent of elastic fibers). It also has a minor role in controlling fat buildup in the liver, helps the digestive and intestinal tracts function more smoothly and can be helpful in some cases of depression.
- 18. Serine TCT, TCC; **Serine (Yang Metal)** a conditional amino acid that is needed for the metabolism of fats and fatty acids, for muscle growth, and for a healthy immune system. There is some concern that elevated serine levels (especially in sausages and luncheon meats) can cause immune suppression and psychological symptoms as in cerebral allergies. Affected Organs: Calliope (Wen Chang) ↔ Left Brain + Lungs. Consequences: Perseus (Qing Yang) ↔ Catalytic Function.
- 19. Serine TCA, TCG; **Serine (Yin Wood)** a conditional amino acid that is needed for the metabolism of fats and fatty acids, for muscle growth, and for a healthy immune system. There is some concern that elevated serine levels (especially in sausages and luncheon meats) can cause immune suppression and psychological symptoms as in cerebral allergies. Affected Organs: Athena (Tian Ji) ↔Brain + Liver + Nervous System.
- 20. Serine AGT, AGC; **Serine (Yang Wood)** a conditional amino acid that is needed for the metabolism of fats and fatty acids, for muscle growth, and for a healthy immune system. There is some concern that elevated serine levels (especially in sausages and luncheon meats) can cause immune suppression and psychological symptoms as in cerebral allergies. Affected Organs: Phantasos (Tan Lang) ← Cerebrum + Liver + Immune System. **Serine (Yang Metal)** + **Serine (Yin Wood)** + **Serine (Yang Wood)** symbolizes Process of Life, i.e. Metal cuts Plants and Trees to control overgrow maintain healthy immune system.
- 21. Tyrosine TAT, TAC; **Tyrosine (Yin Fire)** a conditional amino acid that is used by the thyroid gland to produce one of the major hormones, Thyroxin. This hormone regulates growth rate, metabolic rate, skin health and mental health. It is used in the treatment of anxiety, allergies, and headaches. Tyrosine can act as a mild appetite suppressant. It may also be useful in the control of anxiety or depression. Tyrosine is known as the "anti-depressant" amino acid and serves as the building block for the hormones dopamine and norepinephrine, which create pleasure and well-being. Affected Organs: Dionysus (Lian Zhen) ↔ Mental Organs + Skin Pores (Acne) + Appendix (Small Intestine). Agent: Iris (Tian Yue) ↔ Hormones. Consequences: Zelos (Ling Xing) ↔ Heaty. Ares (Qi Sha) ↔ Hypentension + Anxiety + Depression. Gaia (Di Kong) ↔ Physiological Disorder.
- 22. Tryptophan TGG; **Tryptophan (Yang Earth)** this essential amino acid is a natural relaxant. It helps control hyperactivity, relieves stress, suppresses the appetite, and enhances the release of growth hormones. All these are affected by the level of serotonin. Tryptophan is also a precursor of serotonin. Studies have shown in experiments with Tryptophan supplements that in moderately obese people on a calorie-restricted diet that those subjects on Tryptophan lost significantly more weight than subjects who received a placebo.
- 23. Glutamine CAA, CAG; Glutamine (Yang Earth) a conditional amino acid, which consists of glucose combined with the Glutamic Acid. Studies have shown that Glutamine Sulfate may be of use in treating osteoarthritis or degenerative joint disease. This natural nutrient provides the body with an important raw material that appears to halt the disease process itself. In the body, the main action of Glutamine on joints is to stimulate the manufacture of substances necessary for joint repair. Affected Organs: Demeter (Tian Fu) →Stomach + Muscles + Joints.

- 24. Asparagine AAT, AAC; **Asparagine (Yang Wood)** a non-essential amino acid, which means that it is manufactured from other amino acids in the liver. It does not have to be obtained directly through the diet. Asparagine is interrelated with the amino acid aspartic acid. Low level of asparagines may indicate poor metabolism or synthesis of aspartic acid, which can result in the inability to properly synthesize and excrete urea, which is the major waste product of excess dietary protein. The inability to excrete urea can result in buildup of nitrogen-containing toxic metabolites that can lead to confusion, headaches, depression, irritability, or in extreme cases, psychosis (severe mental disorder with loss of contact with reality). Affected Organs: Phantasos (Tan Lang) ↔ Cerebrum.
- 25. Histidine CAT, CAC; **Histidine** (**Yin Fire**) an essential amino acid is found abundantly in hemoglobin. Histidine maintains nutrients for the myelin sheaths, which surround and insulate nerves. Histidine is required for the production of histamine, and is often used in the treatment of anemia, allergies, rheumatoid arthritis and other inflammatory reactions.
- 26. Glutamic Acid GAA, GAG; **Glutamic Acid (Yin Earth)** a non-essential amino acid that has been shown to improve mental capacities, speeds the healing process of ulcers, and gives a lift from fatigue. It also helps control alcoholism and the craving for sugar. Affected Organs: Zeus (Zi Wei) ↔Brain + Central Sulcus; Odysseus (Ju Men) ↔Mouth + Stomach.
- 27. Aspartic Acid GAT, GAC; **Aspartic Acid (Yang Wood)** a non-essential amino acid, aiding in the expulsion of harmful ammonia from the body. When ammonia enters the circulatory system it acts as a highly toxic substance, which can be harmful to the central nervous system. Its ability to increase endurance is thought to be a result of its role in clearing ammonia from the system. Athletes use it to promote stamina and endurance. The popular sweetener Aspartame is a combination of aspartic acid and phenylalanine. Aspartic acid is considered nontoxic. Some researcher has shown that aspartic acid might be useful in opiate withdrawal. Affected Organs: Phantasos (Tan Lang) ↔Brain + Spinal Cord + Liver.
- 28. Lysine AAA, AAG; Lysine (Yin Earth) an essential amino acid that cannot be manufactured by the human body. It insures the adequate absorption of calcium; helps form collagen, which makes up bone cartilage and connective tissues; and aids in the production of antibodies, hormones and enzymes. Recent studies have shown that Lysine is known for its ability to fight the Herpes Simplex-1 virus and cold sores.
- 29. Arginine CGT, CGC; **Arginine (Yang Fire)** as a conditional amino acid, studies have shown that Arginine can improve immune responses to bacteria, viruses, and tumor cells. It promotes wound healing and regeneration of the liver; causes the release of growth hormones. It also considered crucial for optimal muscle growth and tissue repair. Recent study dicovered that Arginine link to respiratory system. Affected Organs: Hephaestus (Huo Xing) ↔Immune System.Consequences: Poseidon (Di Jie) ↔Abruption (Valcano Eruption).
- 30. Arginine CGA, CGG; **Arginine (Yang Earth)** as a conditional amino acid, studies have shown that Arginine can improve immune responses to bacteria, viruses, and tumor cells. It promotes wound healing and regeneration of the liver; causes the release of growth hormones. It also considered crucial for optimal muscle growth and tissue repair. Recent study dicovered that Arginine link to respiratory system. Affected Organs: Demeter (Tian Fu) ↔Muscle + Skin; Clio (Tian Liang) ↔ Spleen + Stomach; Iolaus (Zuo Fu) ↔ Stomach (Gastric Pain). Consequences: Dionysus (Lian Zhen) ↔Cosmetics.

- 31. Arginine AGA, AGG; **Arginine** (**Yin Earth**) as a conditional amino acid, studies have shown that Arginine can improve immune responses to bacteria, viruses, and tumor cells. It promotes wound healing and regeneration of the liver; causes the release of growth hormones. It is also considered crucial for optimal muscle growth and tissue repair. Recent study dicovered that Arginine link to respiratory system. Affected Organs: Zeus (Zi Wei) ↔ Body Tissue + Spleen. Consequences: Pluto (Lu Cun) ↔ Accumulation. **Arginine** (**Yang Fire**) + **Arginine** (**Yang Earth**) + **Arginine** (**Yin Earth**) symbolizes Process of Nature, i.e. Valcano eruption leads to lava and rich soils. Consequences: Gaia (Di Kong) Yin Fire↔Earth Surface (Replenish); Lava constitutes Metal. Affected Organs: Kratos (Wu Qu) Yin Metal↔ Respiratory Organs.Rich soils constitute lushplants (Yin Wood) and trees (Yang Wood). Affected Organs: Athena (Tian Ji) Yin Wood ↔Liver; Phantasos (Tan Lang) Yang Wood↔Liver.
- 32. Selenocysteine TGA; Selenocysteine (Yang Earth) is the 21st amino acid to be recognized as being encoded onto proteins, with TGA as its genetic codon. Selenocysteine is typically located in enzyme active centers where it is essential for catalytic activity of the selenoproteins. Identification of selenium-related molecular targets and delineation of their pathways may be keys to finding potential therapies or even to preventing cancer. Stop Codon TAA (yXX), TAG (yXX), TGA (yxX), Yang Earth symbolizes Stop.

How to prove DNA and Destiny are correlated?

Sun and Moon are so close to Earth and therefore have direct influence on human body i.e. Sun's yxy, yxY, Yxy,YxY triplet and Moon'sXyX, xyX, xyx, Xyx triplet in human body can be easily observed via *Zi Wei Dou Shu*'s sequencing methods. The following examples of **Correlativity: Macroview Human Behavioral Sequencing** can prove the correlation between DNA and Destiny (Please use www.ziweiuniversity.com for sequencing).

Example1: A total solar eclipse on May 29, 1919 helped prove the general theory of relativity². The findings made Einstein a celebrity overnight, **Sun** is the target to sequence. *Zi Wei Dou Shu* Star *Helios (Tai Yang)* is the equivalent of Sun. *He* is the abbreviation of the *Helios (Tai Yang)*. With the intervention of four fundamental forces, *He* becomes *sHe*, *eHe*, and *wHe*. (Note: *gHe* is not in the *Zi Wei Dou Shu* transformational list, partly because Sun's strong gravitational pull on Earth happening every second).

Albert Einstein was born on 14 March 1879 at 11.30am, sunshine morning, in Ulm, Kingdom of Württemberg, German Empire, a German-born, Jewish descendent theoretical physicist. In 1900, Einstein graduated from Swiss Federal Polytechnic. He then became Citizen of Switzerland. In 1905, he was awarded a PhD by the University of Zurich. The same year, he developed the theory of relativity. In 1916, he published the general theory of relativity. He received the 1921 Nobel Prize in Physics "for his services to theoretical physics, and especially for his discovery of the law of the photoelectric effect", a pivotal step in the development of quantum theory. Einstein's theory of relativity paved the way to nuclear physics, the birth of modern physics. Einstein was succeeded Galilei and Newton as one of the greatest physicist. *TIME Magazine* has named Albert Einstein as the "Person of the Century" on 26 December 1999.

Note: The Twelve Relation Zones are:

Conscious Mind (CM) symbolizes the analytical part of our mind. Everything that we saw, smelt, felt, or experienced is never forgotten. It controls decision making and memory tracking.

Subconscious Mind (SM) symbolizes the subconscious part of our mind where dreams, desires, or fears are formed. It is always known as the hidden power of mind. SM is intangable and is always attached to either CM, AC, CF, BM, CP, or BL in according to one's birth hour.

Parents (PA) symbolize our genetic materials and the relationship with parents. It also symbolizes the government, the court, the school, the chief of the work organization, and the teacher.

Bliss (BL) symbolizes our bliss and morality. This zone plays the driving force behind marriage.

Shelter (SH) symbolizes our family history, shelter surrounding, family members, and assets.

Action (AC) symbolizes our action and career. It also symbolizes academic and intelligence in the early stage of life.

Friends (FR) symbolize human resources, employment contract, social person type, and our relationship with friends and/or subordinates.

Body Motion (BM) symbolizes our body motion with respect to time and the ability to overcome challenges. This zone plays the driving force behind all success or failure in life.

Body Organs (BO) symbolizes the type of symptoms and susceptibility, the source of the disease; the most vulnerable areas on the human body, any major disasters that endanger life, etc.

Cash Flow (CF) symbolizes our source of income and the movement of money.

Sexual Desire (SD) symbolizes our talent, sexual behavior, the relationship with children, children's characteristic and their future development.

Couple (CP) symbolizes mating behaviors, our relationship with spouse. It also symbolizes the behavior and images of spouse.

Sibling (SI) symbolizes our relationship with sibling. It also symbolizes mother, colleagues, ally, and close friends. It also symbolizes your learning desire and creativity.

Macroview Human Behavioral Sequencing

Macroview Human Behavioral Sequencing enables us to observe one's strengths and weaknesses within a decade. *Zi Wei Dou Shu* names this observation as "*Da Xian*" literally means "Big Limitation" or simply called the "Decade Limitation", the Ten-Year Destiny. There is six types of sequencing: Conscious Mind (CM) in relation to Body Motion (BM); Parents (PA) in relation to Body Organs (BO); Bliss (BL) in relation to Cash Flow (CF); Sexual Desire (SD) in relation to Shelter (SH); Action (AC) in relation to Couple (CP); Sibling (SI) in relation to Friends/Subordinates (FR). Because of Helios (Tai Yang) is located in the Sexual Desire zone and therefore the target of sequencing is: Sexual Desire (SD) in relation to Shelter (SH). Note: Quantum Age – a person's age starting at Age 1 right from the time of his/her birth and which automatically increases by one right after Chinese New Year, regardless of his/her birth month and birthday. Note: The terminology of forces used in the sequencing chart: Fundamental Forces, the forces that based on one's birth celestial pole; Spontaneous Forces, the force that acted by zone celestial pole without outside force.

Dominant

Sexual Desire (Decade Limitation Coordinate's Conscious Mind) appears sHelios (Tai Yang), coincident with Spontaneous Force's sHelios (Tai Yang)—Helios (Tai Yang) possesses Yang Fire, is equal to CysteineTGT (yxy), TGC (yxY). The intervention of Strong Nuclear Force (s) leads to Cysteinelevel increased. Strong Nuclear Force renders swapping nucleotide in a codon's third positions e.g., Cysteine (yxy) changes to Cysteine (yxY), and vice versa. The interconverted energy starts when a change from young yang "y" to old yang "Y" or old yang "Y" to young yang "y"causing the change of Cysteine level. As the Cysteine level increased, the static electricity builds up in the body leading to Einstein's unique electrified hair.

Microview Human Behavioral Sequencing

Microview Human Behavioral Sequencing enables us to observe one's strengths and weaknesses within a year, a month, a day, and every two hours. Zi Wei Dou Shu names this observation as "Xiao Xian & Liu Nian" literally means Small Limitation (Year Limitation) & Passing Year, "Yue Xian & Liu Yue" literally means Month Limitation & Passing Month, "Ri Xian & Liu Ri" literally means Day Limitation & Passing Day, and "Shi Xian & Liu Shi" literally means Hour Limitation & Passing Hour. The words of "Limitation" and "Passing" indicate "Yin" and "Yang" respectively.

Sexual Desire (SD) in relation to Shelter (SH) can observe a person's talent, sexual desire, childhood, real estate, intellectual property, family inheritance, etc. There are 9 positive forces and 0 negative forces in the sequencing list. Einstein's talent and intellectual property rights are affirmed.

Sexual Desire Zone: symbolizes talent, sexual desire, and childhood. Scientists have found that there are two kinds of hormones called "ANDROGENS" and "ESTROGEN" in human body odor, in which evokes human desire for passion. "ANDROGENS" is a variant of testosterone that is excreted from male sweat; "ESTROGEN" is associated with female body and is mainly found in female urine. Helios (Tai Yang) possesses Yang Fire is equal to Cysteine (Yang Fire). Pluto (Lu Cun) possesses Yin Earth leading to amino acid accumulation, i.e. the yang fire accumulation. This type of amino acid constitutes hormones that deciding Einstein's talent and sexual desire.

Shelter Zone: symbolizes real estate, intellectual property, and family inheritance. Year Limitation Forces and Passing Year Forces appears gClio (Tian Liang), coincident with Fundamental Force's gClio (Tian Liang), and Angelia (Tian Kui), lead family "good' genes dominant. Clio (Tian Liang) possesses Yang Earth is equal to Arginine (Yang Earth). Angelia (Tian Kui) possesses Yang Fire acting as pheromones. This type of amino acid constitutes pheromones that "attracting" Royal AstronomerArthur Eddington to verify the "light deflection" as predicted by the general theory of relativity.

Note: Hormones are defined as the chemical substances secretary by the endocrine system which consists of group of glands. The hormones help in the regulation of metabolism and energy balance. Hormones acts inside of the body of the animals. Pheromones are defined as a chemical substance which is produced by animals or insects to bring the behavioral changes in another animal or insect of a same species. Pheromones acts outside of the body of the animals or insects.

Note: Decade Limitation Forces (Dominant), Decade Limitation Forces (Recessive), Year Limitation Forces, and Passing Year Forces are the main forces leading body amino acid level change, i.e. the destiny change.

Example 2: Michael Jackson performed the "Moonwalk" during a performance of "Billie Jean" on Motown 25: Yesterday, Today, Forever on March 25, 1983³. The dance move made Jackson a celebrity overnight, **Moon** is the target to sequence. *Zi Wei Dou Shu* Star *Selene (Tai Yin)* is the equivalent of Moon. *Se* is the abbreviation of the *Selene (Tai Yin)*. With the intervention of four fundamental forces, *Se* becomes *sSe*, *eSe*, *gSe*, and *wSe*.

Michael Jackson was born on August 29, 1958 at full moon night around 10:59pm (22:59) in Gary, Indiana. He was an American singer, songwriter, dancer, philanthropist, and socialist. Dubbed the "King of Pop", he was one of the most popular entertainers in the world. The eighth child of the Jackson family, Michael made his professional debut in 1964 with his elder brothers formed The Jackson 5. The Jackson 5 recorded several songs, including their first single "Big Boy" (1968), for Steeltown Records, a Gary record label, before signing with Motown in 1969. He began his solo career in 1971 while at Motown Records. In the early 1980s, Michael Jackson became a dominant figure in popular music. His music videos, including those of "Beat It", "Billie Jean", and "Thriller" from his 1982 album Thriller, are credited with breaking racial barriers and transforming the medium into an art form and promotional tool. The popularity of these videos helped bring the television channel MTV to fame. His other achievements include multiple Guinness World Records including the Most Successful Entertainer of All Time, 13 Grammy Awards, the Grammy Legend Award, 24 American Music Awards—more than any other artist—including the "Artist of the Century", 13 number-one singles in the United States during his solo career. In 2000, the Guinness World Records recognized him for supporting 39 charities, more than any other entertainer. While preparing for his comeback concert series, This Is It, Michael Jackson died of acute propofol and benzodiazepine intoxication on June 25, 2009, after suffering from cardiac arrest. The Los Angeles County Coroner ruled his death a homicide, and his personal physician, Conrad Murray, was convicted of involuntary manslaughter. In 2010, Michael Jackson is set to receive a posthumous Grammy for Lifetime Achievement Award.

Michael Jackson performed the "Moonwalk" for the first time on March 25, 1983

Note: The Twelve Relation Zones are:

Conscious Mind (CM) symbolizes the analytical part of our mind. Everything that we saw, smelt, felt, or experienced is never forgotten. It controls decision making and memory tracking.

Subconscious Mind (SM) symbolizes the subconscious part of our mind where dreams, desires, or fears are formed. It is always known as the hidden power of mind. SM is intangable and is always attached to either CM, AC, CF, BM, CP, or BL in according to one's birth hour.

Parents (PA) symbolize our genetic materials and the relationship with parents. It also symbolizes the government, the court, the school, the chief of the work organization, and the teacher.

Bliss (BL) symbolizes our bliss and morality. This zone plays the driving force behind marriage.

Shelter (SH) symbolizes our family history, shelter surrounding, family members, and assets.

Action (AC) symbolizes our action and career. It also symbolizes academic and intelligence in the early stage of life

Friends (FR) symbolize human resources, employment contract, social person type, and our relationship with friends and/or subordinates.

Body Motion (BM) symbolizes our body motion with respect to time and the ability to overcome challenges. This zone plays the driving force behind all success or failure in life.

Body Organs (BO) symbolizes the type of symptoms and susceptibility, the source of the disease; the most vulnerable areas on the human body, any major disasters that endanger life, etc.

Cash Flow (CF) symbolizes our source of income and the movement of money.

Sexual Desire (SD) symbolizes our talent, sexual behavior, the relationship with children, children's characteristic and their future development.

Couple (CP) symbolizes mating behaviors, our relationship with spouse. It also symbolizes the behavior and images of spouse.

Sibling (SI) symbolizes our relationship with sibling. It also symbolizes mother, colleagues, ally, and close friends. It also symbolizes your learning desire and creativity.

Macroview Human Behavioral Sequencing

Macroview Human Behavioral Sequencing enables us to observe one's strengths and weaknesses within a decade. *Zi Wei Dou Shu* names this observation as "*Da Xian*" literally means "Big Limitation" or simply called the "Decade Limitation", the Ten-Year Destiny. There are six types of sequencing: Conscious Mind (CM) in relation to Body Motion (BM); Parents (PA) in relation to Body Organs (BO); Bliss (BL) in relation to Cash Flow (CF); Sexual Desire (SD) in relation to Shelter (SH); Action (AC) in relation to Couple (CP); Sibling (SI) in relation to Friends/Subordinates (FR). Because of Selene (Tai Yin) is located in the Bliss zone and therefore the target of sequencing is: Bliss (BL) in relation to Cash Flow (CF). Note: Quantum Age – a person's age starting at Age 1 right from the time of his/her birth and which automatically increases by one right after Chinese New Year, regardless of his/her birth month and birthday. Note: The terminology of forces used in the sequencing chart: Fundamental Forces, the forces that based on one's birth celestial pole; Spontaneous Forces, the force that acted by zone celestial pole without outside force.

Dominant

Bliss (Decade Limitation Coordinate's Conscious Mind) appears gSelene (Tai Yin), eSelene (Tai Yin), coincident with Fundamental Force's eSelene (Tai Yin) and Spontaneous Force's gSelene (Tai Yin) – Selene (Tai Yin) possesses Yin Water is equal to Start Codon (Xyx). The intervention of electromagnetic Force (e) and gravitational Force (g) leads to DNA mutation creating a start codon causes body to produce a bunch of a random protein. The author deduces that these random proteins can stimulate creation. Selene (Tai Yin) at Zone 12 is equal to night-time Moon from 9pm to10:59pm, coincident with Michael Jackson was born on 15th Chinese day (Full Moon) around 10:59pm. Body absorbing Moon's essence, i.e. the "qi" of XyX, xyX, xyx, and Xyx, Michael Jackson created unique "Moonwalk" dancing.

Cash Flow (Decade Limitation Coordinate's Body Motion) appears wAthena (Tian Ji), coincident with Fundamental Force's wAthena (Tian Ji), and Spontaneous Force's gAthena (Tian Ji)—Athena (Tian Ji) possesses Yin Wood is equal to Proline (Yin Wood). The intervention of gravitational Force (g) and weak nuclear force (w) leads to Proline level change in the protein structure, causing body's amino acids imbalance, rendering improper functioning of joints and tendons. Michael Jackson created his signature move, the Robot Dance Moonwalk.

Microview Human Behavioral Sequencing

Microview Human Behavioral Sequencing enables us to observe one's strengths and weaknesses within a year, a month, a day, and every two hours. *Zi Wei Dou Shu* names this observation as "*Xiao Xian & Liu Nian*" literally means Small Limitation (Year Limitation) & Passing Year, "*Yue Xian & Liu Yue*" literally means Month Limitation & Passing Month, "*Ri Xian & Liu Ri*" literally means Day Limitation & Passing Day, and "*Shi Xian & Liu Shi*" literally means Hour Limitation & Passing Hour. The words of "Limitation" and "Passing" indicate "Yin" and "Yang" respectively.

Cash Flow (Year Limitation Coordinate's Conscious Mind) appears gAthena (Tian Ji), the Internal Factor, coincident with Fundamental Force's wAthena, Yearly Star Pegasus (Tian Ma), Yearly Deity Discordia (Sui Po) – Michael Jackson's moonwalk step accentuating his extraordinary dancing skill.

Note: Friends/Subordinates (Year Limitation Coordinate's Sexual Desire) appears Yearly Deity Luna (Tai Yin) and Concordia (Sui He) –The audience, of all ages, is exciting and hopping when Michael Jackson singing and dancing to *Billie Jean*. Roman Mythology: Luna is the divine embodiment of the Moon; Concordia, goddess who was the personification of "concord," or "agreement".

Bliss (BL) in relation to Cash Flow (CF) can observe a person's spiritual cultivation, material life, etc. There are 13 positive forces and 5 negative forces in the sequencing list. The spiritual and the material world of Michael Jackson have been improved, and fame has also brought him mental stress.

Bliss Zone: Decade Limitation Forces (Dominant) appears gSelene (Tai Yin), eSelene (Tai Yin), Year Limitation Forces appears sSelene (Tai Yin), Passing Year Forces appears gSelene (Tai Yin), coincident with Fundamental Force's eSelene (Tai Yin) and Spontaneous Force's gSelene (Tai Yin) – Michael Jackson was a talented visual artist. Selene (Tai Yin) possesses Yin Water + Calliope (Wen Chang) possesses Yang Metal is equal to Start Codon (Xyx) + Serine (Yang Metal). The intervention of strong nuclear force (s), electromagnetic force (e), and gravitational force (g) leads to DNA mutation creating a start codon causes body to produce a bunch of a random protein. The combination of random protein and serine constitutes hormone that stimulated Michael Jackson's passion in creating art.

Cash Flow Zone: Decade Limitation Forces (Dominant) appears wAthena (Tian Ji), Year Limitation Forces appears gAthena (Tian Ji), coincident with Fundamental Force's wAthena (Tian Ji), Spontaneous Force's gAthena (Tian Ji), and Pluto (Lu Cun) – Michael Jackson's extraordinary dancing skill brought him wealth.

Note: Decade Limitation Forces (Dominant), Decade Limitation Forces (Recessive), Year Limitation Forces, and Passing Year Forces are the main forces leading body amino acid level change, i.e. the destiny change.
